

ISOMARK Thixotropic Compounds

ISOMARK Grade / Part Number	Description and Key Features	Working Life @ 25°C	Curing Time @ 25°C
T-1 Grey (T-1G)	Fast curing compound. Ideal for cold conditions and when used with backing paper. Specially formulated to give optimum contrast characteristics for comparator microscopy.	30 seconds.	2-3 mins.
T-2 Grey (T-2G)	Slower curing version of T1 Grey. Suitable for ambient temperatures above 20°C.	3 mins.	10 mins.
T-1 Black (T-1B)	Fast curing compound. Ideal for cold conditions and when used with backing paper. Specially formulated for high magnification optical microscopy with incident illumination.	1 min.	3 mins.
T-2 Black (T-2B)	Slower curing version of T1 Black. Suitable for ambient temperatures above 20°C.	3 mins.	10 mins.
